

Brain-Computer Interface (BCI) Research

We are recruiting normal subjects to perform listening tests to measure the intelligibility of speech in subjects participating in BCI research.

Eligibility:

- 18-50 years of age
- Native English speaker
- Normal hearing and speech

Details:

- Listen to audio clips of natural and artificial speech
- Answer questions about what you heard
- Testing lasts no more than 2 hours
- Upon completion, eligible to receive \$20 per hour

Principal Investigator: Nathan Crone, M.D.
Johns Hopkins IRB00167247
